

A Quality battery will have the Cold Cranking amps and other information labeled.
We use Exide but Duracell makes batteries with higher Cold Cranking amps. They can be purchased at Batteries Plus

Use only Group U1 batteries.

Attached picture shows how cables are fastened to the batteries.

Unique Features of the HSB Generator

24 VDC Primary Power

- Provides highspeed starting cycle
- Easier starts in the Winter months

Battery Requirements

Two (2) 12-volt Group U1 batteries in Series with a minimum of 350 CCA each.

Battery size: 7 3/4 L x 5 3/16 W x 7 5/16 H inches (196mm L x 131mm W x 185mm H).

This is based on testing in extreme cold -22°F (-30°C) and heat to 104°F (40°C).
